

SURROUND (CARPET TILE 5T432) IN LIMESTONE (17530) | INSTALLED MONOLITHIC

StrataWorx® Carpet Tile

Innovation in Every Layer

StrataWorx® combines modern materials and innovative manufacturing practices resulting in a backing that is durable and lightweight. A total of 20 StrataWorx® tiles ship per box, resulting in easier handling, storage and installation compared to broadloom and PVC or bitumen carpet tiles.

Design on Demand

SelectONE is an In Stock StrataWorx® collection that brings together our design and segment expertise to meet your needs for high-performing, budget-driven choices. Thoughtfully curated into one easy access collection: StrataWorx® carpet tiles from our classic styles Poured, Diffuse and Surround are paired with coordinating LVT choices. This turnkey collection puts everything in one place, ready to ship in one streamlined process. The only decision left to make is the delivery date.

Other StrataWorx® collections are also available to order with longer lead-times.

StrataWorx® Construction

StrataWorx® is a lightweight polymer composite backing system engineered for efficiency in manufacturing, transportation, and at the job site. StrataWorx is PVC-free and contains 30% pre-consumer recycled content. StrataWorx is designed as a durable carpet tile with an accessible price point.

1. Face Yarn

Eco Solution Q® fiber provides long-lasting durability and stain resistance.

2. Primary Backing

High-strength primary backing is non-woven and adds dimensional stability to the product.

3. Performance Precoat

Performance precoat provides tuft bind, ensuring all tufts stay in place.

4. Thermoplastic Compound

Thermoplastic compound laminate bonds the carpet face with the backing for superior strength against delamination.

5. PET/Fiberglass Composite Reinforcement

PET/fiberglass reinforcement creates stability.

Additional Features and Benefits

Cradle to Cradle Certified™

Designed and assessed for environmental and social performance across five critical sustainability categories: material health, material reuse, renewable energy and carbon management, water stewardship, and social fairness.

Value Through Innovation

StrataWorx® is a lightweight polymer composite backing that is PVC-free and contains 30% pre-consumer recycled content. Engineered for efficiency in manufacturing, transportation and at the job site, StrataWorx is designed as a durable carpet tile at an accessible price point.

Indoor Air Quality

People spend 90% of their time indoors, making these environments critical to our wellbeing. This product is Green Label Plus (GLP) Certified, and also exceeds the GBCA's Green Star, and the WELL Building Standard for indoor air quality.

Reduces Waste

Carpet tiles are easier to install, lift and move compared to broadloom carpet. Their modularity typically produces a 10% reduction in waste during installation.

Faster Installation Reduces Cost

Time is money. StrataWorx® is designed for efficiency, ease of handling, installation, and storage, with up to 20 tiles per box. This results in reduced cost, less waste and a faster installation than traditional broadloom. Simple, fast installation with Shaw 5000 or Lokdots.

In Stock

Speed of delivery and exceptional choice come together using our In Stock program. A large variety of carpet tile, plank, and LVT products are available for immediate despatch.
